Nano Lett. **2013**, *13* (8), 3524−3530. DOI: 10.1021/nl400921p

With this erratum, we provide the correct formula and value for eq S-4 in the original Supporting Information to reflect the three-electrode (instead of two-electrode) electrochemical setup in our tests.

$$C_{CNT} = \bar{C} = 2.36\ \text{mF} \tag{S-4}$$

This correction results in a change of value in eq S-6

$$C_{sp} = \frac{C_{CNT}}{V_{CNT}} = \frac{2.36\ \text{mF}}{3.75 \times 10^{-3}\ \text{cm}^3} = 0.63\ \text{F/cm}^3 \tag{S-6}$$

Consequently, we also provide the correct specific capacitance of the Ni-functionalized CNT electrode as 0.63 F/m^2 (instead of 1.26 F/m^2) and the specific capacitance of the pure CNT electrode as 0.11 F/m^2 (instead of 0.22 F/m^2) in the main text.
