State of Irremovable Water in Solid Polymer Films Examined by Fourier Transform Infrared Spectroscopy I: Poly(Ethylene Glycol) Dimethyl Ether

Makato Gemmei-Ide, Tetsuya Motonaga, and Hiromi Kitano* *Langmuir*, published online Feb 9, <http://dx.doi.org/10.1021/la053117f>.

The assignments for the water of hydration, shown in Figure 5A, were partially incorrect. The corrected Figure 5 is given below.

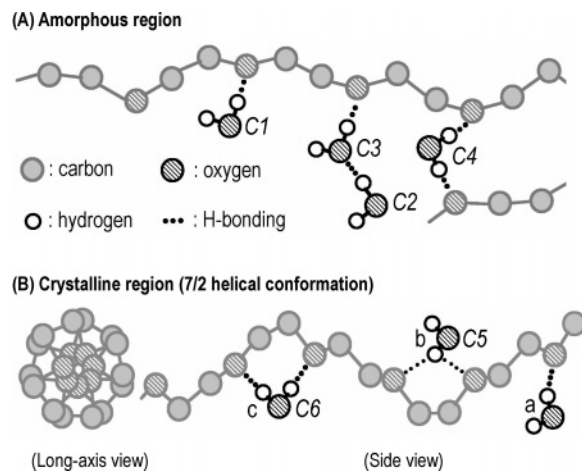

Figure 5.
