

## Additions and Corrections

### Formation of Superhydrophobic Surfaces by Biomimetic Silicification and Fluorination

Woo Kyung Cho, Sung Min Kang, Dong Jin Kim, Sung Ho Yang, and Insung S. Choi\* *Langmuir* 2006, 22, 11208–11213.

On page 11210, the ester bond of the thiol compound in Figure 1 was mistakenly drawn. We corrected Figure 1 with the right structure of the thiol compound. This change does not affect any results discussed in the paper at all.

**Figure 1.** The procedure for the formation of heterogeneously rough silica films.
