

Effects of Hydrogen Bonding on the Monolayer Properties of Amphiphilic Double-Decker-Shaped Polyhedral Silsesquioxanes

[*Langmuir* 2011, 27, 6381 DOI: 10.1021/la200604w]. Asuman C. Kucuk, Jun Matsui* and Tokuji Miyashita

The structures of double-decker-shaped silsesquioxane-based amphiphiles (2H-DDSQ and 2NH-DDSQ) were rendered incorrectly in Figure 1. The corrected structure appears below:

Figure 1
