

High-Rate Solar Photocatalytic Conversion of CO₂ and Water Vapor to Hydrocarbon Fuels

[*Nano Lett.* **2009**, *9*, 731]

Oomman K. Varghese, Maggie Paulose, Thomas J. LaTempa, and Craig A. Grimes*

Pages 734 and 735. The y -axis units of Figure 4b and Figure 5 are incorrect. The units are, correctly, $\text{ppm} \cdot \text{cm}^{-2} \cdot \text{h}^{-1}$ (in accordance with Figure 4a); the quantities are correctly referred to in the text. Also, note the caption of Figure 5 lists a cocatalyst distribution of 52 % Pt nanoparticles and 48 % Cu nanoparticles. These numbers are reversed; it is correctly 52 % Cu nanoparticles, 48 % Pt nanoparticles, in accordance with the manuscript text.
