

## ADDITIONS AND CORRECTIONS

---

2008, Volume 112B

**Maxim V. Fedorov\*** and **Alexei A. Kornyshev\***: Ionic Liquid Near a Charged Wall: Structure and Capacitance of Electrical Double Layer

By error, an untidy earlier version of the Supporting Information was uploaded with the submission of this paper. It is now being replaced by the correct version. The differences between the current and previous versions of the Supporting Information are the following:

- (1) The layout and page design was systematically improved.
- (2) The following corrections have been made:
  - (a) The missing factor, elementary charge,  $e$ , in front of the voltage,  $U$ , was systematically restored in Section 2. Extended Mean-Field Theory (eqs 7, 10, and 13).
  - (b) The name of the y-axis in Figure S2 has been corrected both on the axis and in the caption.

**Supporting Information Available:** Description of the simulation methodology and extended mean-field theory. This material is available free of charge via the Internet at <http://pubs.acs.org>.
