Satoru Masatsuji, Natsuko Nakagawa, and Kaoru Ohno*:
Crossover between Linear and Nonlinear Elastic Behaviors in Random and Self-Avoiding Walks. Volume 41, Number 11, 2008, pp 4037–4041.

Page 4037. Equation 3 contained a misprint. In eq 3, x_N in front of the exponential function in the first two expressions and the summation with respect to i inside the exponential function in the last expression were not necessary. This is just a simple misprint and does not affect any of the following equations. The correct eq 3 should read as follows:

$$
\begin{aligned}
Z &= \sum_{\text{walks}} \exp(\beta X x_N) \\
&= \sum_{\text{walks}} \exp\left[\beta X \sum_{i=1}^{N} (x_i - x_{i-1})\right] \\
&= \sum_{\text{walks}} \prod_{i=1}^{N} \exp[\beta X(x_i - x_{i-1})]
\end{aligned}
\tag{3}
$$
