Addition/Correction

Correction to Atomic Structure and Structural Stability of Sc$_{75}$Fe$_{25}$ Nanoglasses

J. X. Fang,* U. Vainio, W. Puff, R. Würschum, X. L. Wang, D. Wang, M. Ghafari, F. Jiang,* J. Sun, H. Hahn, and H. Gleiter*

In our contribution, eq 1 should be

$$I(q) = r_e^2 N_A^2 a^3 \frac{8\pi \langle \eta^2 \rangle}{(1 + q^2 a^2)^2} + Bq^{-\alpha} + C \tag{1}$$

that is, π should not be squared. In our evaluation of the data the correct formula was used. Additionally, in Figure 5 should read "Strain" not "Stain".
